Professional Profile

Full Stack Developer with over 7 years of experience specializing in the .NET ecosystem and modern frontend technologies (React.js). Proven track record in designing RESTful APIs, microservices architectures, and managing CI/CD pipelines on Microsoft Azure cloud. Expert in implementing design patterns and best practices for modernizing critical applications within government and private sectors. Results-oriented professional, experienced in working in dynamic environments using Agile (Scrum) methodology.

Professional Experience

.NET Developer (Freelance)
February 2026 – March 2026 | United States – Remote

Patient Transportation Management and Monitoring System
Participated in the development of a web platform for managing and monitoring patient transportation services, focused on the management of vehicles, drivers, trips, pickup points, and destinations.

- Developed and designed the web interface using ASP.NET Core MVC, Razor, JavaScript, and Bootstrap.
- Created reusable views and components for managing vehicles, drivers, and trips.
- Implemented a Modular Monolith architecture to separate the main system functionalities and improve maintainability.
- Integrated REST APIs for managing and displaying platform data.
- Used Entity Framework Core and SQL Server for data access and management.
- Used Git for source code version control.

Software Developer / Analyst
Judiciary of the Dominican Republic | March 2018 – February 2025 | Santo Domingo, DR

Virtual Real Estate Registration Office
Web application that allows citizens to manage procedures for acquiring properties and land digitally, track the progress of their requests, and make electronic payments. Currently, the platform serves over 10,000 active users.

- Developed APIs using a microservices architecture with ASP.NET Core.
- Implemented RabbitMQ for asynchronous payment processing and messaging.
- Integrated Redis to optimize queries and enhance system performance.
- Applied xUnit for backend unit testing.
- Managed SQL Server databases using Entity Framework and Dapper.
- Built responsive user interfaces with Telerik UI and Bootstrap.
- Configured CI/CD pipelines with Azure DevOps.
- Deployed the application on Azure App Service and Azure SQL Database.
- Applied design patterns and SOLID principles to solve complex technical challenges.

Cadastral Parcel Consultation System
Web module that enables users to visualize land parcels in the Dominican Republic using polygons generated from geometric coordinates extracted from XML files. The platform also features interactive maps that display protected areas across the country.

- Developed a Full-Stack solution with ASP.NET Core MVC and Entity Framework.
- Integrated geospatial data using Google Maps API.
- Implemented visual components with Telerik and JavaScript.
- Managed data with SQL Server and integrated external services using Refit.

- Designed a responsive interface with Bootstrap.

Real Estate Registry Services Catalog
Web application that provides information about the different services offered by the institution and managing applications for cadastral titles.

- Developed Full-Stack solutions with ASP.NET Core MVC and Web API.
- Managed databases using SQL Server, Entity Framework, and Dapper.
- Integrated external services via Refit.
- Designed responsive interfaces with Bootstrap.
- Implemented unit tests with xUnit.
- Configured deployments on Azure App Service and Azure SQL Database.
- Set up CI/CD pipelines using Azure DevOps.

Full Stack Developer (Freelance)
August 2020 – December 2020 | Santo Domingo, DR

Electronic Accessories Sales System
Participated in the development of an e-commerce system for selling electronic accessories, focusing on two key modules: Product Catalog and Shopping Cart.

- Developed interfaces using ReactJS, Vite, and Tailwind CSS.
- Global state management using Redux.
- Built a RESTful API with Node.js and TypeScript.
- Used PostgreSQL for product and transaction storage.
- Created unit tests with Jest to ensure code quality.

Software Developer / Analyst
SEABOARD | October 2017 – March 2018 | Santo Domingo, DR

Payroll System – Attendance Control Module

- Developed and maintained attendance control functionalities with ASP.NET MVC 3 and Entity Framework.
- Generated reports using Crystal Reports (PDF and Excel formats).
- Built adaptive interfaces with Bootstrap and jQuery.
- Optimized queries with LINQ and stored procedures in SQL Server.
- Integrated biometric devices (fingerprint readers).
- Performed deployment and configuration on IIS.

Education

Bachelor's Degree in Software Engineering
Universidad del Caribe (UNICARIBE) – Santo Domingo, RD
2020 – 2024

.NET Developer – Centro de Tecnología Universal (CENTU)
Centro de Tecnología Universal (CENTU) – Santo Domingo, RD
2015 – 2016

Technical Skills

Framework | Language | Library: ASP.NET Core, C#, JavaScript, TypeScript, HTML, CSS, Entity Framework, React.js, Node.js, Redux
Databases: SQL Server, MySQL, PostgreSQL, Redis
Cloud Platforms: Microsoft Azure

Testing: xUnit, Jest
Tools & Technologies: Git, Docker, RabbitMQ, Google Maps API, CI/CD (Azure DevOps, GitHub)
Methodologies & Principles: Agile – Scrum, SOLID Principles, Clean Architecture

Languages

Spanish: Native
English: Upper-intermediate (B2)
Italian: Intermediate (B2)
